Features and Benefits of Deckmate Ladder

Features:

- A safety feature for access onto and off of flatbeds.
- Hooks easily to the rub rails.
- Added pocket, near right hand handle, so a pry bar can be inserted to give extra leverage.
- Portable folding ladder, only 30" when folded.
- Easily stored even in the bunk, the only ladder that folds properly.
- Lightweight steel, only 20 pounds, no extra weight at the scales.
- Anti skid steps, powder painted for durability, reflective markers, non-pinch hinge.
- Hangs at a convenient working angle.
- Strong, light and completely portable.
- For vans, reefers and straight trucks a bolt on bracket is required.

Benefits:

- **Safety**, which is the biggest concern today because of spinal compression from jumping, and the injuries to ankles, knees and hips are a big issue with drivers.
- Prevents falling from climbing over the wheels to gain access to the flatbed.
- Prevents bodily injuries from long term jumping off trailers. This is one of the most costly processes associates with truckers.
- Also, it's a real bonus for companies that have the ladders as it shows they care about the drivers and helps protect them from being sued for injuries.
- With the aging population of drivers and the overweight problems, the Deckmate certainly makes it easier for them to do their job.
- With young drivers coming on, if they start using the ladder, it helps protect them from injuries that can become permanent in years to come.
